

### ABOUT ME

I'm a passionate young web developer with a solid foundation in integration (HTML, CSS, Bootstrap), JavaScript logic, and PHP development. Currently pursuing a professional degree in cybersecurity at ESA, I'm strengthening my skills in system security, Linux administration, and SOC analysis. Curious, detail-oriented, and open to collaboration, I'm ready to contribute to web, tech, or security projects—whether as an intern, freelancer, or active contributor.

### SKILLS

- Languages & Tools: HTML, CSS, JavaScript, PHP
- Frameworks & Libraries: Bootstrap, ReactJS
- Version Control: Git & GitHub
- Database Management: MySQL
- Design Principles: Responsive Design & UI/UX awareness

### PROFESSIONAL EXPERIENCE

#### Web Developer – OrgaAfrica

Since July 2025

- Designed ergonomic and visually appealing mockups for a clear, modern interface tailored to ambitious entrepreneurs
- Fully developed the showcase website with a responsive design optimized for desktop, tablet, and mobile devices
- Conducted thorough testing to ensure performance and cross-browser compatibility for a seamless user experience
- Implemented on-page SEO strategies to boost StartuperSchool's visibility on search engines and attract targeted traffic

#### Web Designer & Front-End Developer

Since January 2025 – Freelance

- Built responsive web interfaces using HTML, CSS, Bootstrap, and JavaScript for optimal display across all devices
- Designed marketing visuals and brand identity assets using Canva, ensuring consistency and appeal across platforms
- Created mini showcase websites and landing pages for client and personal projects, focusing on clarity and conversion
- Collaborated with project owners to enhance their digital presence and align web solutions with their business goals

#### HACKATON IT – Lomé Business School

Mai 2025

- Collaborated in a fast-paced team environment to solve a complex technological challenge under time constraints
- Designed and developed a responsive e-learning web platform tailored to user engagement and accessibility
- Built a chatbot capable of generating complete startup pitches based on structured input data
- Presented a working prototype to a technical jury, demonstrating functionality, design, and innovation

### FORMATION

#### Bachelor's Degree in Cybersecurity (in progress)

Ecole Supérieure des Affaires  
2023-2026

#### Mobile Development

Power Learn Projetct  
Since Juillet 2025

#### Baccalaureat Serie D

CPL "The Wise"  
2023

### KEY ACHIEVEMENTS

- Designed and launched StartuperSchool, a responsive showcase website with SEO optimization and cross-browser compatibility
- Collaborated with project owners to create tailored landing pages and improve their digital presence
- Developed an AI-powered chatbot capable of generating startup pitches from structured input data
- Built a complete e-learning platform prototype and presented it to a technical jury during a team-based challenge
- Created consistent brand identities and marketing visuals using Canva for various freelance and personal projects
- Pursuing a Bachelor's in Cybersecurity, with hands-on experience in ethical hacking, secure server configuration, and network analysis

### RECOMMANDATIONS
